

On-site monitoring and control

Connect field instruments and equipment to dashboards, history, alerts and control workflows on your Modulink Basestation.

Modulink Basestation

\$1,000 / unit

Shared on-site hub · 2.4 GHz quad-core processor · 8 GB RAM · US915 LoRaWAN · dual-band Wi-Fi 5 · Gigabit Ethernet.

Hosts dashboards, history, alerts, secure user access and API access.

[Product details →](#)

Modulink Agri

\$500 / unit

Up to 3 Watermark 200SS sensors · 1 DS18B20 probe · 1 Hunter 9 V DC latching valve · 4 C-size alkaline cells · private LoRaWAN US915.

Over one year of battery life. Root-zone monitoring and irrigation control. Sensors, probe, valve and batteries are separate accessories.

Modulink Indi LoRa

\$500 / unit

2 passive 4–20 mA inputs · 2 ground-referenced 0–10 V inputs · 1 selectable 4–20 mA or 0–10 V output · 24 V relay-driver interface · LoRaWAN US915.

Distributed industrial monitoring and control. Nominal 24 V DC power; input range 19.2–32 V DC.

Modulink Indi Wi-Fi

\$500 / unit

2 independently wired 4–20 mA inputs · H-bridge output with 1 A current limit · standard 12 V or 24 V industrial DC power · dual-band Wi-Fi 5.

Industrial sensing and compatible motor/actuator interfaces. Custom Edge AI Skills can be developed on request.

Modulink Software

On-site readings, dashboards, history, user roles, audit logs and backup/restore tools. Application-specific Skills support irrigation and industrial workflows. Software is delivered as compiled binaries, with customer API access.

Core monitoring runs locally; live weather and external services need connectivity. Terminal outages can leave gaps in readings. Equipment safety interlocks remain independent of Modulink.

Build and Price

Hardware is a one-time purchase. Skills start at \$20 per terminal per month, billed annually. Engineering assistance: \$200/hour. Applicable Skills and final scope are confirmed with your quote.

Power supplies, batteries, mounting hardware, sensors, probes, valves and relay accessories are separate line items. Cabling and site network work are additional. Travel is extra; customers pay shipping and applicable sales tax.

Installation and support

Modulink hardware: one-year limited warranty against manufacturing defects. Exclusions apply. [Warranty terms](#).

Customer self-installation, remote diagnostics and over-the-air updates are supported. Documentation is available on request; the electronic installation and configuration guide is in preparation.

In operation at Falcon Water Technologies since 2025.
